GO GREEN WITH OLA

Ola's Green Initiatives

As a family-friendly venue, Ola Beach Club has always sought to **create meaningful experiences for guests of all ages**, especially the younger generation.

Eco Paddle was born from our **monthly beach clean-up initiatives** — a reflection of our community's shared commitment to caring for the environment.

Through partnerships with NEA and MSE, we aim to amplify these efforts by **providing greater access to environmental education and engaging more families and young participants** in a fun, active, and impactful way with our **Go Green with Ola workshops**.

We **successfully launched our hydroponic systems** at Ola Beach Club in October 2025, as part of our ongoing sustainability initiatives.

BEACH CLUB

Driven by our commitment to sustainability, Ola Beach Club has been actively involved in a wide range of initiatives from our monthly beach clean-ups, microgreen planting kits to eco paddling activities, all offered to the community at no cost.

Join us for 55 sustainability workshops, supported by the SG Eco Fund, as we continue to inspire collective action toward a greener future.
